The QAPP says Weston or Weston contractors will perform data validation. Could you or Lyndsey check with SERAS to get a price per sample so we could compare?

Thanks

What does your QAPP say about “validating” the data? SERAS has certified data validators, but they will want to charge too. They have validated radiological data for R3 before during the Fracking sampling effort in Pennsylvania a few years back. I am not sure what they would want to charge, but it may be worth looking into.

Good Morning:

We have a lot of soil data coming our way. Having the data validated by Weston CHP is very expensive. Attached are the past products we discussed previously. They are now about to give us the validated data from the March 2016. The expense and the timing is an issue. Do you have any suggestions on how we can accomplish this in house?

Thanks

Eric,

Attached are the two previous data validation reports that have been generated by the Weston CHP.....one for the NFB Site and one for the HTC Site from the August 2015 soil sampling events. We have also had the Weston CHP prepare two separate data validation reports for the CRU Site. The soil samples collected from the NFB Site in March 2016 are the samples that are currently in question in regards to the need to validate. Please let me know how you would like to proceed.

Thanks,

Tim

Good Morning All:

Can you refresh my memory? Have we had the CHP from Weston validate any previous soil data for NFB and HTC?

This data set has yet to be validated. If you don't have a need for the validation for the March 2016 soil samples than there is no need to bring in this support. Please let me know how you would like to proceed.

Hi Pete and Tim. Did we have the Weston HP validate this data in the past? I thought My only request for HP was getting cost estimates for T&D

Regards,

Eric

Subject: Niagara Falls Boulevard Site - CHP Specialized Labor Support

Eric,

Per your request, RST 3 has procured the services of a Weston Certified Health Physicist (CHP) in support of the Removal Assessment being conducted at the Niagara Falls Boulevard Site under TDD No. TO-0007-0011. The CHP support is being brought in to validate the radiological parameter analytical results for the soil and rinsate blank data collected in March 2016 as part of the Removal Assessment of the Site which were submitted to the RST 3-procured laboratory (Pace Analytical). The following samples will be validated by the Weston CHP:

118 Soil

3 Rinsate Blanks

121 Total

The validation of these samples has been delayed due to the priority being placed on completing the CRU radiological validation first. It is estimated that 303 hours will be needed to complete the validation. The detailed cost breakdown associated with this specialized labor request can be found in the attached document. **The total cost for the CHP support for the Niagara Falls Boulevard Site is \$33,330.00.**

Please concur to this email if you are in agreement and then I will forward the

necessary paperwork over to the Contracting Officer. If you have any questions or comments please let me know.

Thanks,

Timothy Benton, CHMM
